

Dataset Overviews

Item	Details
Dataset	Global superstore
Rows	51290
Column	27
Domain	Retail

Column Documentation

Row ID

Column Name	Row_id
Data Type	Integer
Business Meaning	uniquely identify each record
Why Company Stores It	To uniquely identify each transaction record
Used for Analysis?	no
Example Value	25245

Order ID

Column Name	Order_id
Data Type	Text
Business Meaning	Unique identifier for every customer order
Why Company Stores It	To track customer order,invoice
Used for Analysis?	yes
Example Value	CA-2011-151295

Order date

Column Name	Order_date
Data Type	Date
Business Meaning	Date on which customer placed the order
Why Company Stores It	To analyse sales trends over time
Used for Analysis?	yes
Example Value	07-01-2011

Ship date

Column Name	Ship_date
Data Type	Date
Business Meaning	Date on order shipment
Why Company Stores It	To track shipment dates
Used for Analysis?	Yes
Example Value	07-12-2016

Ship mode

Column Name	Ship_mode
Data Type	Text
Business Meaning	Shipping method selected for the order.

Used for Analysis?	Yes
Example Value	Corporate

Country

Column Name	Country
Data Type	Text
Business Meaning	Country where the customer is located
Why Company Stores It	To analyze international sales
Used for Analysis?	yes
Example Value	India

City

Column Name	City
Data Type	Text
Business Meaning	City where the customer is located
Why Company Stores It	To identify high performing cities
Used for Analysis?	Yes
Example Value	Chennai

State

Column Name	State
Data Type	Text
Business Meaning	State where the customer is located
Why Company Stores It	To compare sales performance
Used for Analysis?	yes
Example Value	Tamil nadu

Postal code

Column Name	Postal code
Data Type	integer
Business Meaning	Postal code of the customer's location
Why Company Stores It	support logistics planning
Used for Analysis?	No
Example Value	60045

Region

Column Name	Region
Data Type	Text
Business Meaning	Geographic sales region
Why Company Stores It	To compare regional performance
Used for Analysis?	Yes
Example Value	West

Market

Column Name	Market
Data Type	Text
Business Meaning	Business market where order belongs
Why Company Stores It	To evaluate sales global market
Used for Analysis?	No
Example Value	US

Product id

Column Name	Product_id
Data Type	Text
Business Meaning	Unique identifier for each product.
Why Company Stores It	To uniquely identify products
Used for Analysis?	Yes
Example Value	OFF-PA-10002893

Category

Column Name	Category
Data Type	Text
Business Meaning	Main product category
Why Company Stores It	To measure category-wise sales
Used for Analysis?	Yes
Example Value	Office supplies

Sub-Category

Column Name	Sub_category
Data Type	Text
Business Meaning	Specific product group within a category
Why Company Stores It	To identify top and low performing
Used for Analysis?	Yes
Example Value	Chairs

Product name

Column Name	Product_name
Data Type	Text
Business Meaning	Name of the product sold
Why Company Stores It	To analyze product performance
Used for Analysis?	Yes
Example Value	Xerox 225

Sales

Column Name	Sales
Data Type	Float
Business Meaning	Revenue generated from the order
Why Company Stores It	To measure business revenue
Used for Analysis?	Yes
Example Value	283.4

Quantity

Column Name	Quantity
