JULY 2026

Project Overview

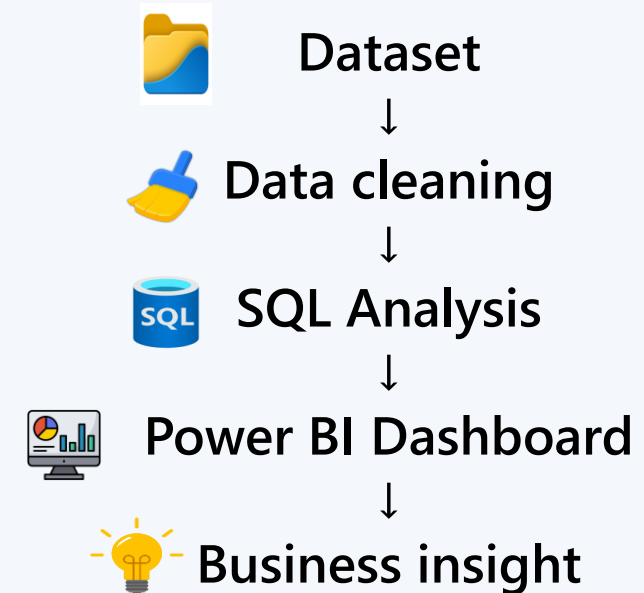

Project Objective

- Analyse Global Superstore sales data to evaluate overall business performance.
- Identify sales trends, customer behaviour, product performance, and regional performance.
- Calculate key business KPIs such as Sales, Profit, Orders, Quantity, and Profit Margin.
- Build an interactive Power BI dashboard using SQL, Excel, and DAX for data-driven decision-making.

Tools Used |  SQL |  Excel |  Power BI |  DAX

Project Workflow

The project follows a structured process from data preparation to business insights.

Dataset Overview

Dataset Information

Fields	Value
Dataset Name	Global Superstore
Source	Kaggle
Records	51290
Columns	24
Time period	2011 to 2014
Countries	147
Market	7

Customer Details

Customer ID • Customer Name • Segment

Product Details

Product ID • Product Name • Category • Sub Category

Sales Details

Sales • Profit • Quantity • Discount

Location Details

Country • State • City • Region • Market

Order Details

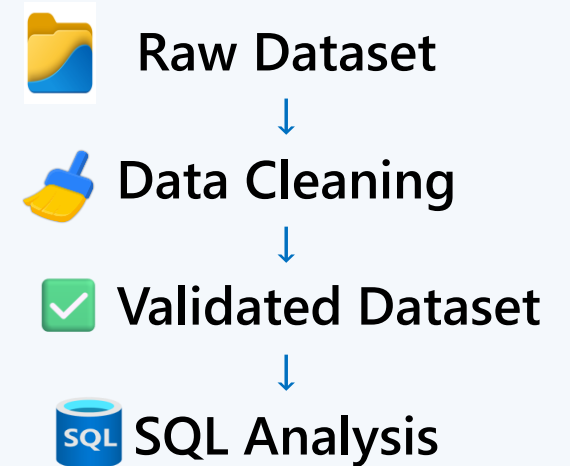

Order ID • Order Date • Ship Date • Ship Mode

Data Cleaning & Preparation

Data Cleaning Steps

- ✓ Checked for missing or blank values.
- ✓ Verified that no duplicate records existed
- ✓ Standardized date format.
- ✓ Verified numeric and text data types.
- ✓ Cleaned product names by removing unnecessary special characters.
- ✓ Created calculated fields.
- ✓ Prepared the dataset for SQL analysis and Power BI reporting.

SQL Analysis & Key Findings

Business Analysis Areas

Sales Performance Analysis

Customer Analysis

Product Performance

Time - Based Analysis

Market & Regional Analysis

Key KPIs

Total Sales

\$12.68M

Total Profit

\$1.47M

Total Orders

25,035

Profit Margin

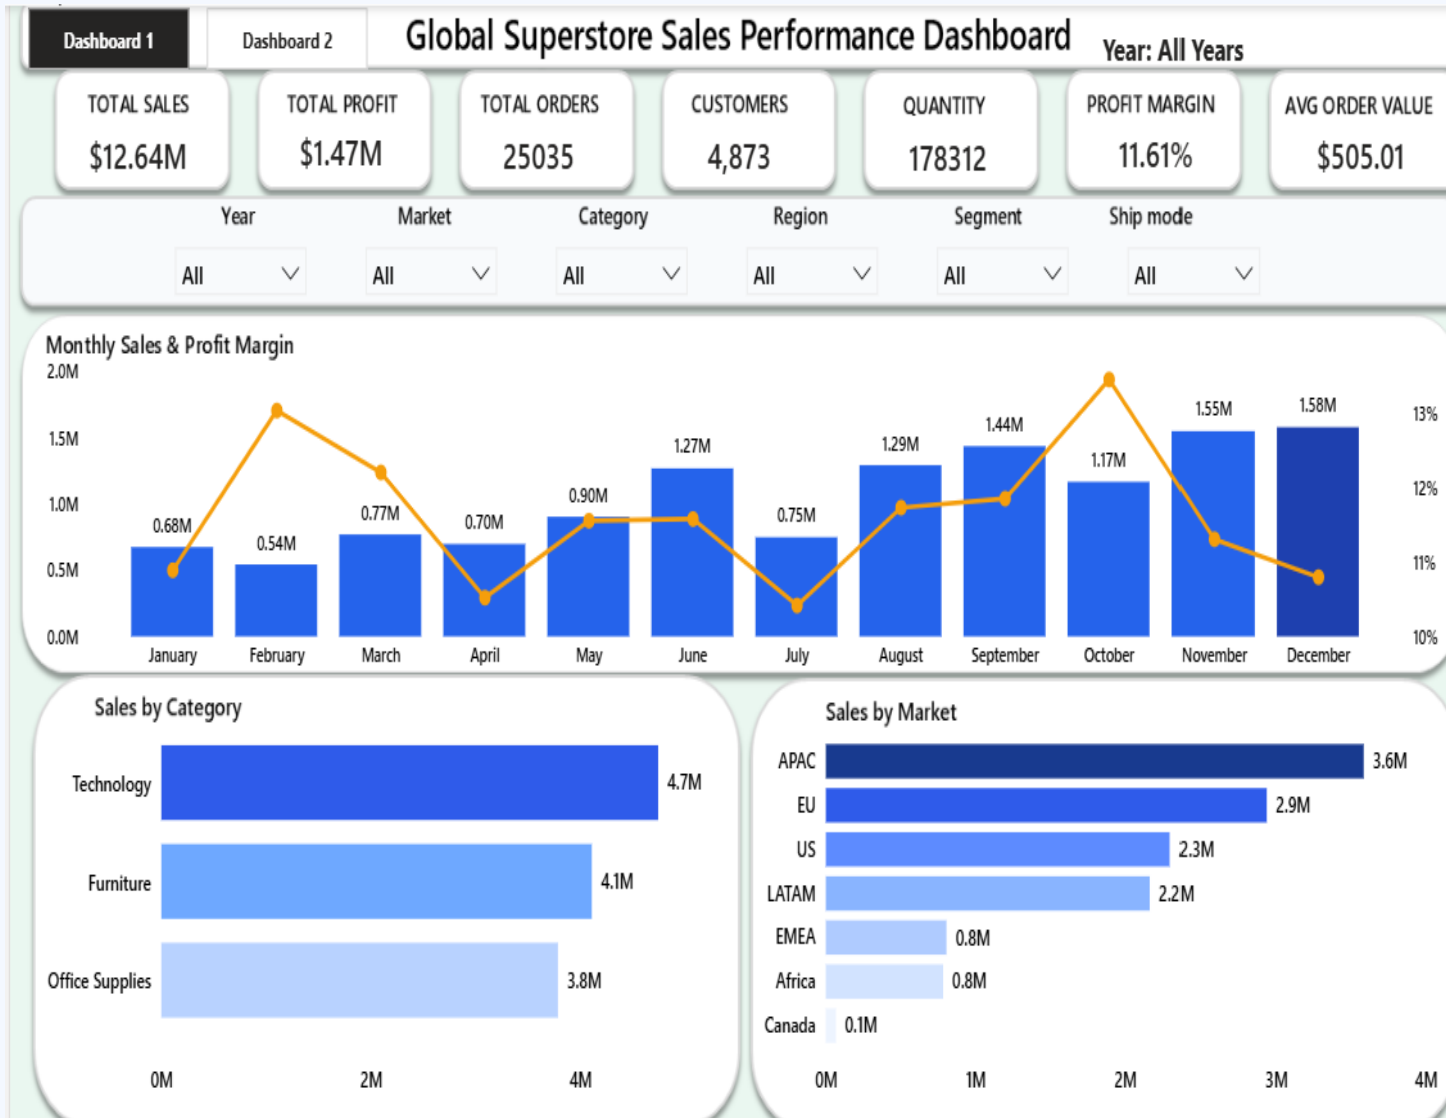

11.61%

SQL Techniques Used

SQL was used to calculate KPIs, analyze sales performance, and generate business insights for the Power BI dashboard.

- SELECT & WHERE
- GROUP BY
- ORDER BY
- AGGREGATE Functions & Date Functions

Dashboard 1 – Sales Performance Overview

Dashboard Purpose: Provides an interactive overview of sales performance, business KPIs, category trends, and market performance.

Business KPIs

- Total Sales
- Total Profit
- Total Orders
- Customers
- Quantity
- Profit Margin
- Average Order Value

Trend Analysis

- Monthly Sales
- Monthly Profit Margin

Category Analysis

- Sales by Category

Interactive Filters

- Year
- Market
- Category
- Region
- Segment
- Ship Mode

Market Analysis

- Sales by Market

Dashboard 1 – Key Business Insights

Sales Trend

- Sales showed an upward trend throughout the year, with peak performance in Q4.
- December recorded the highest monthly sales (\$1.58M).
- February showed strong profit margin despite lower sales.

Category Performance

- Technology was the top revenue-generating product category.
- Furniture ranked second.
- Office Supplies contributed the lowest revenue.

Market Performance

- APAC was the highest-performing market.
- Europe ranked second.
- Canada generated the lowest sales.

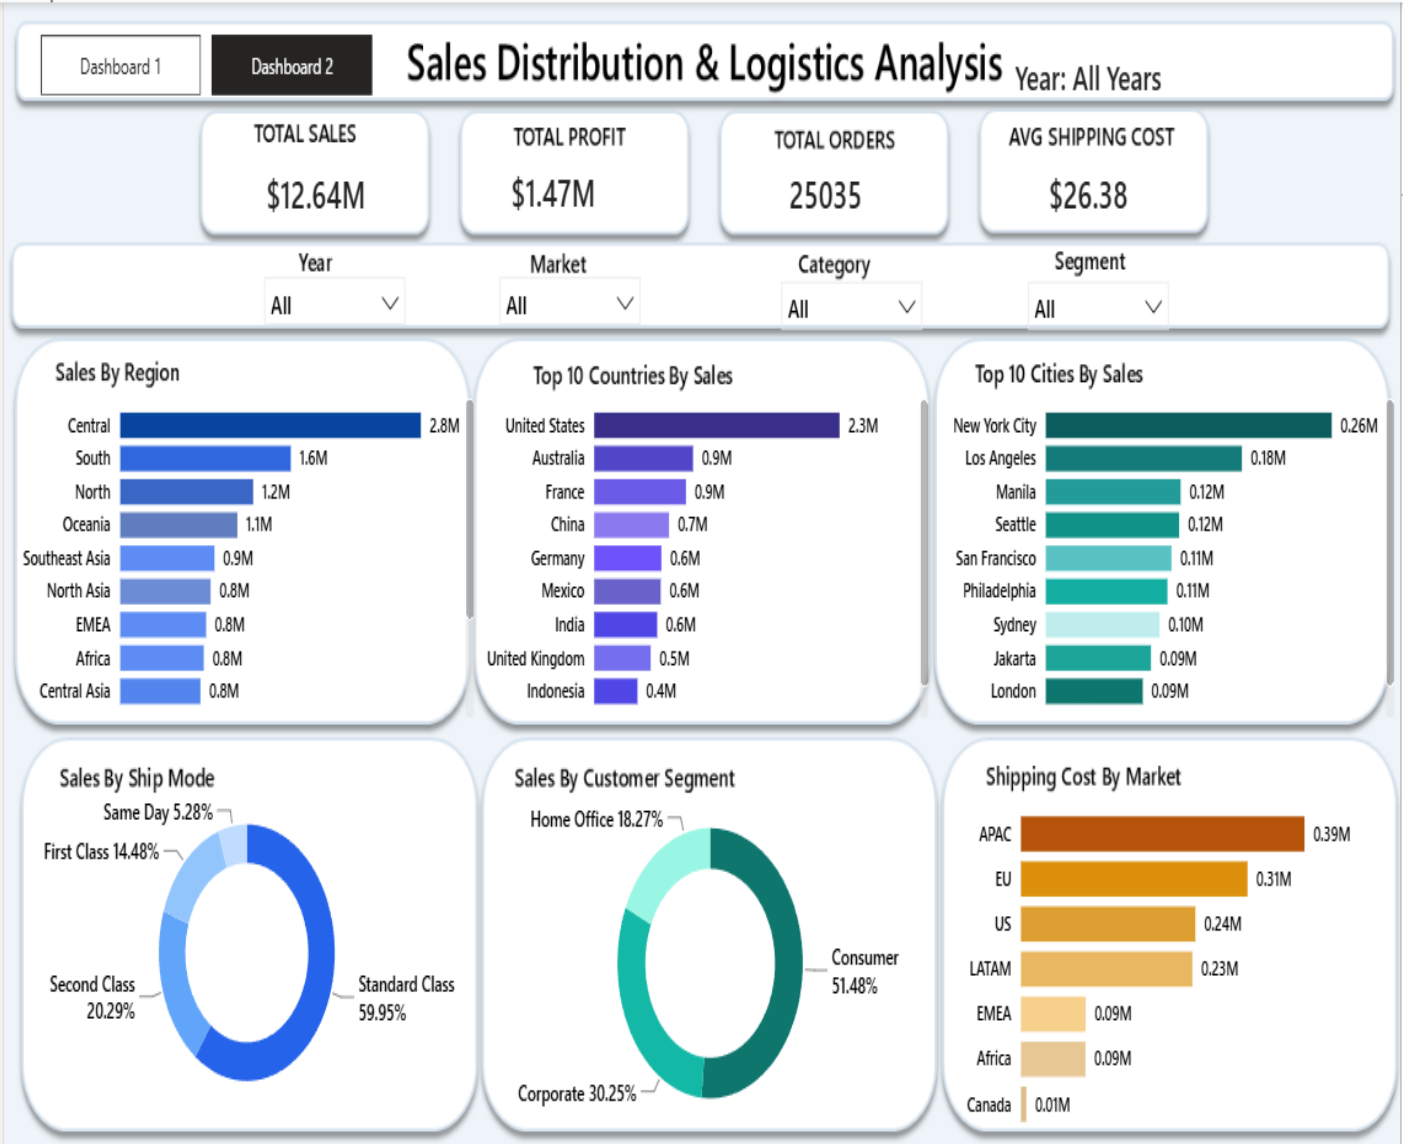

Overall Business KPIs

- Total Sales: \$12.64M
- Total Profit: \$1.47M
- Profit Margin: 11.61%
- Average Order Value: \$505

Key Takeaway

Technology products and the APAC market were the primary revenue drivers. Sales increased consistently throughout the year, with the strongest performance in Q4 while maintaining a healthy 11.61% profit margin.

Dashboard 2 – Regional & Logistics Performance Overview

Purpose : Analyse regional sales performance, geographic distribution, shipping efficiency, and customer segments to support operational and logistics decisions.

Geographic Analysis

- Sales by Region
- Top 10 Countries by Sales
- Top 10 Cities by Sales

Shipping Analysis

- Sales by Ship Mode
- Shipping Cost by Market
- Average Shipping Cost KPI

Customer Segment Analysis

- Sales by Customer Segment

Interactive Filters

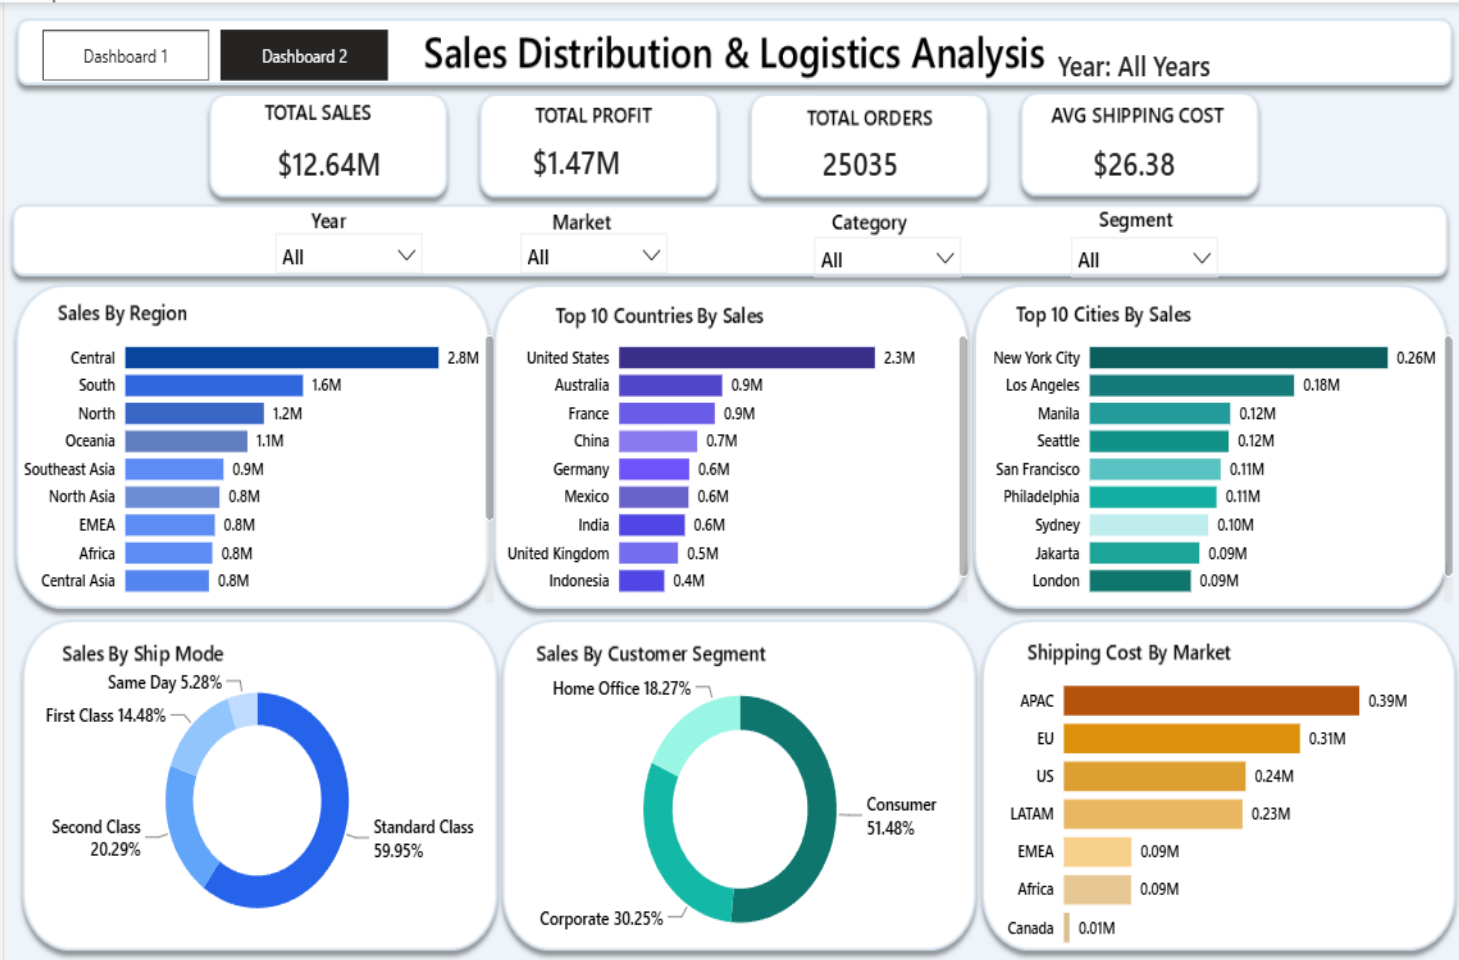

- Year
- Market
- Segment
- Category

Overall Business KPIs

- Total Sales
- Total Profit
- Total Orders
- Average Shipping Cost

Dashboard 2 – Key Business Insights

Geographic Performance

- Central Region generated the highest regional sales.
- United States was the highest-performing country.
- New York City recorded the highest city-level sales.

Shipping Insights

- Standard Class contributed the highest share of sales.
- APAC incurred the highest shipping cost.
- Average Shipping Cost was \$26.38 per order.

Customer Segment

- Consumer Segment contributed the highest share of sales.
- Corporate Segment ranked second.
- Home Office represented the smallest customer segment.

Overall Business Performance

- Total Sales: \$12.64M
- Total Profit: \$1.47M
- Total Orders: 25,035
- Average Shipping Cost: \$26.38

Key Takeaway

The United States and Central Region were the strongest revenue contributors. Standard Class handled the majority of sales, while the Consumer Segment generated the highest share of sales, highlighting key markets and customer groups for business growth.

Project Conclusion & Recommendations

Project Summary

- Analyzed the Global Superstore sales dataset using SQL and Power BI.
- Cleaned and transformed data for accurate reporting.
- Developed interactive dashboards to analyze sales, products, regions, and shipping performance.
- Generated actionable business insights to support data-driven decision-making.

Business Recommendations

- Increase inventory and marketing efforts for the Technology category, as it generated the highest sales.
- Focus sales and promotional campaigns on high-performing regions and markets to maximize revenue.
- Optimize shipping operations in markets with higher shipping costs to improve profitability.
- Develop targeted offers for Corporate and Home Office customers to increase sales across all customer segments.

Key Findings

- Technology was the top-performing product category (\$4.7M sales).
- December achieved the highest monthly sales (\$1.58M).
- Central Region and the United States were the top revenue contributors.
- The Consumer Segment generated the largest share of sales, while Standard Class was the most commonly used shipping mode.

Skills Demonstrated

- SQL Querying
- Data Cleaning
- KPI Analysis
- Power BI Dashboards
- Data Visualization
